## High Performance Heat Shrink Tunnel

## TLAA＝1245／TSS＝1845／PLLA＝1265／RSS＝1865

An industrial heat shrink tunnel use heat to shrink film around packages．This machine is designed to work with $L$ bar sealer or sleeve wrapper bundler，but also stand alone for shrink banding applications，is compatible with a wide range of standard product sizes and offer optimum shrink performance while using minimum space．

3．Adopt long metal heater，durable and stable．
4．Heater drawer design，for easy inspection and heater connection changing．
5．Conveyor speed controlled by frequency inverter，speed adjustable $10-40 \mathrm{~m} /$
min．
6．Standard live roller design
7．Adjustable airflow vents control the airflow volume by frequency inverter
8．Both side lateral airflow direction is Adjustable
9．Insulation layer between heating zone and outer skin of about 100 mm to
minimize heat loss．
Options：
1．Stainless Steel Machine construction
2．Openable Tunnel cover
3．Cooling at the tunnel exit
4．Dead Roller mechanism

## Standard Feature

1．Thermal circulation system using heat integrated design，rapid temperature raises up．
2．SSR and PID temperature control，temperature tolerance $\pm 1{ }^{\circ} \mathrm{C}$

2．Openable Tunnel cover
