

Semi-Automatic L-Type Sealing Machine

AP-1622A/AP-1622AP/AP-2028A/AP-2028AP/AP-3040A/AP-3040AP/AP-4048AP

This machine is an economic solution for packaging of any solid product. It may couple with APT-1810 Heat Shrink Tunnel to form a completed packaging line.

AP1622AP+APT-1810 Heat Shrink Tunnel

Stainless Steel Compensator Assembly allows operator to adjust wire temperature, unit compensates for residual heat in wire from previous cycle. Precise control of heat means consistent seals every cycle.

Teflon Coated Ceramic "V" Groove Beads under seal wire are designed to withstand high sealing temperatures and provides the highest quality and most consistent seals every time.

Pin Wheel Hole Punch : Places multiple rows of holes to allow air evacuation from package.

AP-1622A

Feature

1. Anti-adhesive Teflon Coated Sealing Blade ensures neat and firm seal without smoke pollution. Overheat protect function extends the lifespan; hand clamping protect device avoids mistakenly damaging the product and also for the safety of the operator.
2. Dual magnet clamping increases the sealing force ensuring a firm seal.
3. Easy adjustment of sealing and conveyor time.
4. Quick film loading Design and advanced pin perforation device.
5. Selected electrical components from reliable international manufacturer.
6. Heavy duty castor with lock device makes an easy move and locate.
7. AP-1622AP Type, Pneumatic Cylinder Type Sealer offers Manual and Auto Mode for operation. The whole sealing cycle is done by cylinder, which lessens power of work and improves efficiency.
